Generals on Garci tape probed

By Ben S. Rodriguez

In an apparent attempt to influence the outcome of the 2009 election, General Francisco "Bibo" Villar, Chief of Staff General Artemio Tiu, and other military officials were allegedly involved in a "leak" of a tape recording of President Gloria Macapagal Arroyo's conversation with General Villar.

Arroyo's alleged involvement in the 2009 election fraud was a major factor in her impeachment. The tape recording of her conversation with Villar, which was leaked to the public, showed her discussing the election results with the general.

Mts. Station, Tucson, Arizona. His recent
research publications are concerned with
the evolution of the spring anthers and
the pollen tube growth. His work
concerns the evolution of the pollen tube
growth and the pollen tube growth.

Knowing a little bit about your company can help you present a better, more organized and professional performance in your interview.

Next, we are assuming that the system is stationary in time. This means that the system is in a steady state, and the results of the simulation are not affected by the initial conditions. This is a reasonable assumption for many systems, but it may not be valid for all systems. For example, if the system is not in a steady state, the results of the simulation may be affected by the initial conditions. In this case, we would need to run the simulation for a long enough time to reach a steady state before we can make any conclusions about the system's behavior.

These results suggest that the presence of a social network is important for the well-being of older adults. The results also suggest that the presence of a social network is important for the well-being of older adults.

The second stage was devoted to the development of a questionnaire. The questionnaire was developed by the author, based on the literature and the results of the first stage. It was a self-administered questionnaire, consisting of a series of 10 statements, each with a five-point Likert scale (1 = strongly disagree, 5 = strongly agree). The statements were related to the following dimensions: (1) the importance of the organization's mission, (2) the organization's commitment to the environment, (3) the organization's commitment to the community, (4) the organization's commitment to the employees, (5) the organization's commitment to the customers, (6) the organization's commitment to the suppliers, (7) the organization's commitment to the government, (8) the organization's commitment to the media, (9) the organization's commitment to the public, and (10) the organization's commitment to the society.

More careful screening usually depends not on the type of job but on the type of candidate. "We can't afford to allow anyone who is not a team player, who is not a hard worker, and who doesn't deserve a big reward through sales to join our company," says Spennberg. "We don't hire based on personality and I don't think others should either."

[illegible]

the 1990s, although the results are inconsistent in some instances. These studies also report that the relationship with age is:

Conclusions

None of the reviewed studies is of high methodological quality and the results are inconsistent. However, the results do suggest that the prevalence of the condition is low (4.4%). The heterogeneity in the quality of the studies included in the review could not be explained. The review is limited by the search strategy and the search period.

believed that the "new" and "old" ways of doing business were not mutually exclusive, but rather, they were "blended." The company's success came from a synthesis of the two. The company's success came from a synthesis of the two.

Young officers vow to oust GMA

MANILA (AP) — A group of young officers in the Philippine military has vowed to oust General Fidel V. Ramos from the presidency, saying they are tired of his "corrupt and authoritarian" rule.

The officers, who are members of the Philippine Military Academy (PMA) and the Philippine Army, said they are tired of Ramos' "corrupt and authoritarian" rule.

They said they are tired of Ramos' "corrupt and authoritarian" rule and want to see a change in leadership.

Reds face arrest as enemies of state

MANILA (AP) — The Philippine government has announced that it will arrest anyone who is a member of the Communist Party of the Philippines (CPP) or its armed wing, the New People's Army (NPA).

The government said that anyone who is a member of the CPP or NPA is an enemy of the state and will be arrested.

Tams clip Eagles; Falcons

By Jason Lee-M. Reyes

THROUGH some ups and downs, especially for the two teams, the Tams won.

During the game, the Tams were outplayed for most of the game. The Tams, who were the underdog, won the game by a score of 10-9.

And, much like the Tams, the Eagles were outplayed for most of the game. The Eagles, who were the favorite, won the game by a score of 10-9.

"We were able to win the game, which is a big win for us," said the Tams' coach. "We were able to win the game, which is a big win for us."

OPINION

Editorial: The Philippines' political system is in a state of crisis. The government is corrupt and inefficient. The judiciary is weak and biased. The police are brutal and corrupt. The military is a threat to civil liberties. The media is biased and corrupt. The people are poor and oppressed. The future is uncertain.

Figure 1 is a line graph showing the effect of temperature on the rate of reaction. The x-axis is labeled 'TEMPERATURE (°C)' and has major tick marks at 10, 20, 30, 40, and 50. The y-axis is labeled 'RATE OF REACTION' and has major tick marks at 0, 1, 2, 3, 4, and 5. The curve starts at approximately (10, 0.5), rises to (20, 1.5), (30, 2.5), (40, 3.5), and ends at (50, 4.5). The curve is smooth and shows a positive correlation between temperature and the rate of reaction.

1. The first step is to identify the main topic of the document. This is often found in the title or the first few paragraphs.

2. The second step is to identify the key points or arguments made by the author. These are often found in the body paragraphs.

3. The third step is to identify the evidence used to support the key points. This can include statistics, quotes, or references to other sources.

4. The fourth step is to identify the conclusion or final point made by the author. This is often found in the final paragraph.

5. The fifth step is to identify any other important information, such as dates, names, or locations.

1. The first step is to identify the variables that are being measured. In this case, the variables are the number of people who are employed, the number of people who are unemployed, and the total number of people in the labor force.

1. The first step is to identify the variables involved in the problem. In this case, the variables are the number of hours worked (H) and the number of hours of sleep (S).

2. The second step is to write down the constraints. The constraints are:

- The total number of hours in a week is 168 (24 hours per day).
- The number of hours worked (H) must be non-negative (H ≥ 0).
- The number of hours of sleep (S) must be non-negative (S ≥ 0).

3. The third step is to write down the objective function. The objective function is the total utility (U), which is a function of H and S.

4. The fourth step is to solve the problem. This can be done using the method of Lagrange multipliers or by using a graphing calculator.

5. The fifth step is to check the solution. This involves checking that the solution satisfies all the constraints and that it is a maximum.

Abstract The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health-related quality of life (HRQL) of sedentary middle-aged women. The study was a randomized controlled trial. The participants were randomly assigned to either a training group or a control group. The training group performed a 12-week program of aerobic and resistance training. The control group did not participate in any training. The primary outcome was the change in HRQL, measured using the SF-36 questionnaire. The secondary outcome was the change in physical fitness, measured using a 6-minute walk test. The results showed that the training group had a significant improvement in HRQL and physical fitness compared to the control group. The findings suggest that a 12-week training program can improve the physical fitness and HRQL of sedentary middle-aged women.

Figure 1 consists of two scatter plots. The top plot shows a positive correlation between the number of children and the number of children in the household. The bottom plot shows a negative correlation between the number of children and the number of children in the household.

Wave of the future

By Dan Lee

During and after the 2004 fashion week, the Philippines' fashion industry is expected to see a wave of the future. The wave is the global premiere of the Philippines' fashion design.

By Dan Lee
Photo: Dan Lee

Like a wave, the Philippines' fashion industry is expected to see a wave of the future. The wave is the global premiere of the Philippines' fashion design.

The Philippines' fashion industry is expected to see a wave of the future. The wave is the global premiere of the Philippines' fashion design.

Feeling grand in the grandeur that is Greece

When you're in Greece, you're in a world of grandeur. The ancient ruins of Athens, the beautiful beaches of Mykonos, and the vibrant culture of the Greek islands are all waiting for you to discover them. It's a place where time seems to stand still, and where the sun is always shining.

Why don't you go to Greece?
 It's a beautiful country with a rich history and a vibrant culture. The ancient ruins of Athens, the beautiful beaches of Mykonos, and the vibrant culture of the Greek islands are all waiting for you to discover them.

LIFE STYLE

MY ANTI-CELLULITE and anti-water retention secret weapons

Stand firm and face proud

IN SEARCH of the most potent beauty products, I have really high standards when it comes to skin firmers. My preferences are the ones I can get from the dermatologist's office because they are surely more potent than the ones sold over the counter. The store-bought ones I listed may have pretty impressive results, but they are not as strong as those from the doctors. Because I use the applications, people have commented that my arms, face and thighs look smaller and jiggle only very minimally now.

Firmer body: Belo MD skin firming and whitening lotion (P1,100) evens out my body's skintone while tightening the slack areas such as my buttocks, breasts, stomach, arms and thighs.

I also apply Jeunesse Copper Peptide serum and then Elastic Firmers with Lavender Oil (also for face) on top. But these should not be mixed with Vitamin C lotions as they will cancel out each other.

On days I have been very undisciplined exercise-wise, I apply the copper peptide on slack areas, then seal it off with Belo MD lotion all over the body. I really see and feel the difference the next morning when my clothes just slide on.

Clarins Total Body Lift Stubborn Cellulite Control not only improves cellulite but contracts my stomach and thighs so clothes fit better.

You may also try Shiseido Body Firming Cream and Phytomer Seabornic Body Firming Cream and EReal Stretchmark corrector cream.

Supplement: Twinlab DMAE capsules from Health Express (P700) tone up the muscles on my face, throat and arms. It contracts and flexes the muscles while purging toxins. The skin eventually gets tighter.

Firmer face/eye area: Shu Uemura Beta G Eye Cream, Comfort Zone No More Puffy Eyes (P1,245) and Sundari Neem Eye Cream (P1,800). Both tackle dark circles as well as puffy eyes.

Lifetime Skin Care Products Day

MAKEOVER 911

Kinny Salas

Firming Serum with Alpha Lipic Acid and DMAE (P3,300) is the strongest topical face cream I have found. It tones up slackening cheeks, jawline and hands.

Battling PMS water retention: Every time it's that week before that time of the month for me, I gain four pounds of water weight that settle on my hips, thighs, face and stomach. People tell me outright I got fat and don't believe me when I tell them it's water weight. My clothes fit looser that I get into a bad mood and even burst into tears because of frustration.

Checking our cycles

Thank goodness for the French who have devoted an entire section of their pharmacy for oils or creams that drain excess fluid so we are no longer at the mercy of our cycles.

My top picks: Clarins Anti Eau Oil (P1,950) and Nuxe Spa Tonic Drainage Oil, both are double-duty cellulite eliminators.

Try also D'Occitane Amande Gelee shaping gel, Shiseido Body Creator (the only Japanese brand strong enough to qualify as anti-water retention) and Phytomer Body Declic Anti Eau cream.

Massage the formula on the body after a shower and you will notice a feeling of lightness. You will also make frequent trips to the bathroom to pee.

Announcement: You Hair and Body Salon at The Fort has finally opened. I chose to review the "maintenance treatments" because it is what people keep coming back for.

Lyn did a fabulous job in making me look elegant with my eyebrow threading, squared pedicure with very quirky nail art (I picked a cherry for every nail), and foot spa with massage.

Gloria gave me a square sheer nude manicure. You can't buy the classy nude shades they use outside, but I found a perfect match with Basic nail polish in Future's French for toes and Potato Fields for fingers.

Mr. Y is the shop's star Korean stylist for digital perm. You will get big romantic ringlets that stay close to the head and body. It starts from the ears down that's why they are called hanging curls.

For Belo MD lotion, call 844-2939. For Copper Peptide serum and cream, call Jeunesse Manila, 6888062. Sundari, Comfort Zone, and Essie nail polish are exclusively available at Es-sences. DMAE capsules and Lifetime Skin Firming serum are available at Health Express. Call 8929364.
